

Question 1

Correct

Marked out of 1.00

[Flag question](#)

Coders here is a simple task for you, you have given an array of size N and an integer M .

Your task is to calculate the **difference between maximum sum and minimum sum of $N-M$ elements** of the given array.

Constraints:

$1 \leq t \leq 10$

$1 \leq n \leq 1000$

$1 \leq a[i] \leq 1000$

Answer: (penalty regime: 0 %)

```

1  #include <stdio.h>
2  int main()
3  {
4      int t;
5      scanf("%d",&t);
6      while(t--)
7      {
8          int n,m,d,min,temp;
9          scanf("%d %d",&n,&m);
10         d=n-m;
11         int arr[n];
12         for(int i=0;i<n;i++)
13         {
14             scanf("%d",&arr[i]);
15         }
16         for(int j=0;j<n;j++)
17         {
18             min=j;
19             for(int k=j;k<n;k++)
20             {
21                 if(arr[k]<arr[min])
22                     min=k;
23             }
24             temp=arr[min];
25             arr[min]=arr[j];
26             arr[j]=temp;
27         }
28         int maxsum=0,minisum=0;
29         for(int a=0;a<d;a++)
30             minisum=minisum+arr[a];
31         for(int b=n-1;b>m-1;b--)
32             maxsum=maxsum+arr[b];
33         printf("%d\n",maxsum-minisum);
34     }
35 }
36 }
37 return 0;
38 }
```

Question 2

Correct

Marked out of 1.00

[Flag question](#)

A new deadly virus has infected large population of a planet. A brilliant scientist has discovered a new strain of virus which can cure this disease. Vaccine produced from this virus has various strength depending on midichlorians count. A person is cured only if midichlorians count in vaccine batch is more than midichlorians count of person. A doctor receives a new set of report which contains midichlorians count of each infected patient, Practo stores all vaccine doctor has and their midichlorians count. You need to determine if doctor can save all patients with the vaccines he has. The number of vaccines and patients are equal.

Answer: (penalty regime: 0 %)

```
1  #include <stdio.h>
2  int main()
3  {
4      int m,n,o,p,q=1;
5      scanf("%d",&m);
6      int a[m];
7      int b[m];
8      for(int i=0;i<m;i++)
9      {
10         scanf("%d",&a[i]);
11     }
12     for(int i=0;i<m;i++)
13     {
14         scanf("%d",&b[i]);
15     }
16     for(int j=0;j<m-1;j++)
17     {
18         n=j;
19         o=j;
20         for(int k=j+1;k<m;k++)
21         {
22             if(a[k]<a[n])
23             {
24                 m=o;
25             }
26             if(b[k]<b[n])
27             {
28                 o=k;
29             }
30         }
31         p=a[n];
32         a[n]=a[j];
33         a[j]=p;
34
35         p=b[o];
36         b[n]=b[j];
37         b[j]=p;
```

```

38 |
39 |
40 |     for(int i=0;i<n;i++)
41 |     {
42 |         if(a[i]<=b[i])
43 |         {
44 |             q=0;
45 |             break;
46 |         }
47 |     }
48 |     if(q==1)
49 |     {
50 |         printf("YES");
51 |     }
52 |     else
53 |     {
54 |         printf("No");
55 |     }
56 |     return 0;

Question **3**

Correct

Marked out of

You are given an array of n integer numbers a_1, a_2, \dots, a_n . Calculate the number of pair of indices (i, j) such that $1 \leq i < j \leq n$ and $a_i \text{ xor } a_j = 0$.

Answer: (penalty regime: 0 %)

```

1 #include <stdio.h>
2 int main()
3 {
4     int n,c=0;
5     scanf("%d",&n);
6     int arr[n];
7     for(int i=0;i<n;i++)
8     {
9         scanf("%d",&arr[i]);
10    }
11    for(int i=0;i<n-1;i++)
12    for(int j=i+1;j<n;j++)
13    {
14        if((arr[i]^arr[j])==0)
15        {
16            c++;
17        }
18    }
19    printf("%d",c);
20    return 0;
21 }
```

[Flag question](#)

You are given an array **A** of non-negative integers of size **m**. Your task is to sort the array in non-decreasing order and print out the original indices of the new sorted array.

Example:

A={4,5,3,7,1}

After sorting the new array becomes A={1,3,4,5,7}.

The required output should be "4 2 0 1 3"

Answer: (penalty regime: 0 %)

```
1 #include <stdio.h>
2 int main()
3 {
4     int n;
5     scanf("%d",&n);
6     int arr[n];
7     for(int i=0;i<n;i++)
8     {
9         scanf("%d",&arr[i]);
10    }
11    int max=arr[0];
12    for(int i=0;i<n;i++)
13    {
14        if(arr[i]>max)
15            max=arr[i];
16    }
17    max++;
18    int min=0;
19    for(int a=0;a<n;a++)
20    {
21        for(int b=0;b<n;b++)
22        {
23            if(arr[b]<arr[min])
24                min=b;
25        }
26        printf("%d ",min);
27        arr[min]=max;
28    }
29    return 0;
30
31
32 }
```
